DIRECT ENGRAVING TECHNOLOGY

CONTI Laserline CSX

Daetwyler is the exclusive U.S. and Canadian distributor of CONTI Laserline.

Daetwyler

Innovating print performance since 1972.

CONTI Laserline **CSX**

An extremely versatile printing plate for use on soft plate carriers. Suitable for water- or solvent-based and UV/EB curing ink systems.

- » Roll material
- » Overall dimensional stability
- » Reduced press chatter
- » High-resolution engraving
- » Consistent print
- » Less plate swelling*
- » Long lifetime / less abrasion
- » Improved ink laydown

Technical Data

Printing surface (Solvent-free):

Color:	EPDM / black
Surface:	fineground
Roughness RZ (DIN 4768):	7.0 µm
Roughness RA (DIN 4768):	0.9 µm
Surface hardness (DIN 53505):	65° Shore A
Compressibility:	1.14 mm: With 135 N/cm ² 0.04 mm
Carrier:	Calibrated foil
Nominal thickness (ISO 12636).	0.76 mm to 2.84 mm

* suitable for water-, alcohol-based inks as well as UV curing ink systems
